Feeding Directions

This is an ingredient designed to supplement the animals diet. When using this ingredient to develop a complete feed, contact an Animal Nutritionist for mixing directions

This is a feed ingredient and is not designed to be fed as a complete ration. This ingredient does not contain supplemental vitamins and minerals. Do not use this ingredient if wet, moldy, or insects are present.

Corn Chops are another popular item, most often fed as a scratch grain but also very useful for other livestock as well. It truly is a product that can be used with any species of livestock and is a safe energy source for all domestic livestock if fed appropriately. It can cause digestive issues if overfed to ruminants and horses, so ask about feeding rates if you are not familiar with this item.
